

ROASTING OVEN INSTRUCTIONS

FIREPITS UK

HANDMADE IN BRITAIN

UNIQUE HAND-FORGED BRITISH MADE FIRE PITS

CAUTION: The steel of the roasting oven will get hot – do not touch without heat resistant gloves

Your roasting oven will be coated in manufacturing oil when it is delivered. We recommend seasoning the oven prior to use to remove the oil. Heat to a medium temperature and wash with warm soapy water. Dry thoroughly and rub over with a small amount of cooking oil.

To use as a Roasting Oven

Place on the BBQ Rack over hot embers (not flames) and allow to warm for five minutes. Add your food and put the cloche top in place. If you are roasting meat, you can remove from the Roasting Oven; and place directly on the BBQ Rack to finish off and get that fire pit flavour.

To use as a Smoker Box

To use as a Smoker Box, use over a low heat of hot embers, not flames. Add your smoker chips or smoking powder to the bottom plate; the chips usually come with instructions – abide by the amounts stated. Place the grill plate on top above the smoker chips; place the food you're going to smoke on top of the grill and place the cloche top over the contents. Put the Smoker Box on the BBQ Rack over the hot embers. Smoke the contents for the stated length of time on the smoker pellets instructions. When the powder has burnt out or stated length of time is up and you wish to smoker for longer – add more chips and continue.

To use as a Pizza Oven

Place a pizza stone directly onto the BBQ Rack and add the roasting oven lid. Heat over hot embers to for 5 minutes. Place the pizza on the pizza stone and replace the lid. Depending on the heat the pizza will take approximately 5/10 minutes to cook.

After Care

To clean your swing arm and any other Firepits UK cookware, wash the item well and dry thoroughly. Rub over some cooking oil before storing away. If any rust develops, scrub this off with a wire brush and repeat the seasoning process above.

Your fire pit is designed to live outdoors all year round and over time it will develop its own natural patina. If you wish to you can rub over with a wire brush and then oil. However, it is fine to leave them outside and allow them to take their natural course.

Please be aware that as the fire pits will oxidise, rust can mark stone terraces and paving slabs. If placed on a lawn, the heat from the fire may scorch the grass underneath.
